

**VINCI 7**  
Instruction manual

## Introduction

Thank you for purchasing the Apart VINCI 7, our 20th Anniversary Limited Edition loudspeaker.

This story began 20 years ago. The result is here now. VINCI 7 sets new standards in affordable reference bookshelf speakers. By keeping the design as simple as possible, we managed to create a true high end speaker with the highest value for money. Of course, this is a typical feature for all products of the Apart brand. Compact, audiophile, neutral but captivating... Each component was carefully ear-chosen and tested. The result is an ultra linear performer, with great dynamics and stable stereo imaging. With the optional speaker stand, the speakers are positioned at ideal listening height. When properly installed, these speakers will provide you with many years of listening pleasure. Just sit back, relax and enjoy.

*Please read this manual carefully before using the product. This will give you the necessary product and installation instructions to assure a seamless installation and non-compromised overall sound quality.*

## Safety instructions

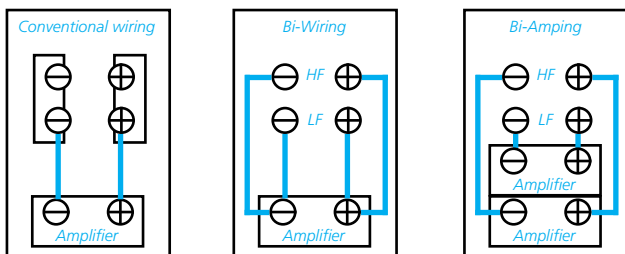

- Keep this manual for future reference.
- Take care of your speaker wires, they should be free of damage. Damaged speaker wires may result in poor sound quality and can damage amplifiers.
- No main power shall be connected to the loudspeakers, doing so will damage the speaker.
- This speaker should only be serviced by qualified personnel. If not warranty might be void.
- Use cables of the right gauge, certainly for long runs.
- Use cables with clear color indication and maintain polarity throughout the whole system.
- Avoid loud feedback from microphones, this can damage your speaker.
- Please check the unit's condition after unpacking. If the outside of the carton box has been damaged, inform your shipper immediately.

## Speaker positioning

Ideally, you should position the speakers on ear level.

In order to achieve this we suggest our VINCI7ST. A speaker stand that has been designed especially for the VINCI 7 loudspeaker and which fits the VINCI 7's design concept perfectly. Ask your local dealer for more information.

## Connecting the speakers

There are 3 possible ways to connect your new VINCI 7 speaker:

- Conventional
- Bi-wiring
- Bi-amping.

*Note: when using the bi-amping method, you need 2 preferably identical amplifiers per speaker. Each amplifier delivers full range audio signals at the same volume level. No need to mention: always use good quality speaker cable. The speaker terminals accept cables up to 6 mm<sup>2</sup> and 4 mm banana connectors.*

## Specifications

Recommended amplifier	50 to 200 watts, no clipping
Nominal impedance	6 Ohm
Frequency response (+- 3 dB)	50 – 25000 Hz
Low frequency point	39 Hz
LF speaker	7 inch poly cone, die cast frame
HF speaker	1 inch silk dome
Cabinet	Bass reflex
Dimensions HxWxD (mm)	370 x 220 x 315 (including grille), 370 x 220 x 300 (without grille)
Weight	10.1 kg
Cabinet material	High gloss finish MDF
Colour	Black
Speaker stand (optional) HxWxD (mm)	650 x 190 x 270 Base plate (W x D): 260 x 360
Speaker stand (optional) weight	7 kg
